

ALMETAL

# Self-propelled hay chopper

# Benefits

Versatile: it can work with loose hay or straw.

Its 68-knife rotor produces a clean, precise chop.

Maximum stability and optimal maneuverability thanks to the wide handlebar.

 $\checkmark$ 

Low maintenance.

Full speed control by the operator thanks to its throttle control and its powered drive wheels make running the unit effortless.

# For efficient, low-effort chopping and spreading of straw and hay

### Features

13 HP Honda motor with electric starter

48" (122 cm) tub diameter

Grate for standard chop lengths

ALMETAL

Constant.

**Options & accessories** 

ALMETAL

#### // Fine cut grate

// Conical extension for extra capacity

#### **Standard or Flotrac**

This self-propelled bedding chopper is available in a standard or Flotrac model. Both offer the same advantages, while the Flotrac model also includes flotation tires and a steerable rear tire for use in rougher terrain.

#### Large capacity tub

The large capacity tub means fewer trips to the filling station. Its all-steel monocoque design eliminates risk of drive hoop breakage. It is also equipped with a longlasting UHMW bottom seal.

**Easy spreading** 

The two adjustable flaps located at the exit of the chopper allow you to set the desired ejection distance. With a range of up to 17' (5 m), you can quickly distribute the bedding your animals need for their comfort.

Heavy-duty steel rotor

The pre-assembled knife sets on smooth spacer discs making replacement or reversing quick and easy. The spiral knife rotor shaft ensures smooth operation and consistent bedding flow with less horsepower, while reversible mounting reduces maintenance costs.

## **Specifications**

**Flotation wheels - Flotrac** 

The three large tractor-type, low-pressure tires provide great traction in all conditions, and the powerful hydrostatic pump easily handles heavy loads.
