

# Xtra-Press

Screw-press manure separator

## **Benefits**

- ✓ Low maintenance.
- ✓ Produces the driest output on the market.
- ✓ Reduces labor costs.
- ✓ Fully automated operation controlled by easy-to-use touch-screen.

## **Highest capacity on the market!**

Meaning less run time and energy use.

## **Features**

Choice of 10 HP or 15 HP drive

High-precision stainless steel 2-piece screen

On-board screen vibrator

Full stainless steel construction

### **Uniform bedding quality**

The fully automated Xtra-Press features air-operated exit doors, providing constant pressure to ensure uniform bedding quality. The finger-wheel on the auger exit breaks up clumps to ensure uniform drying.

### **Unique vibrating screen**

The unique vibrator keeps screens extra-clean, producing up to 25% more throughput and drier solids (approx. +2%). The two-piece screen saves you money, needing only replacement of the 12" (30 cm) long end section in the highest wear zone.

### Fully automated system

Our control panels monitor and operate the system to ensure consistent quality, while keeping you informed and in control anywhere you go through the Valmetal app. Internet connection required.

### Recycled manure bedding: an economic, ecologic and safe solution.

- Recycled bedding eliminates the need to use traditional bedding such as straw, sand or wood shavings.
- It reduces the on-farm storage requirements for traditional bedding.
- It reduces the total volume of manure to store, mix and spread each year.
- It gives a second life to fiber not digested by the cow.

## Offer them comfort!

The ability to produce unlimited quantities of high-quality bedding ensures maximum comfort for the cows. **Increased resting time promotes increased production!**

**Recycled bedding is soft, fluffy and odorless!**
